Key insight

QCOM Shows Signs of Strength Despite Handset Headwinds

Market read

Despite ongoing pressure from handset declines, QCOM's recent earnings report and positive technical indicators suggest a bullish outlook. The company exceeded revenue expectations and raised its non-handset target, highlighting growth in auto and IoT segments. Traders are optimistic about the potential for AI-driven growth in data center and edge computing.

Strategy context

QCOM's recent performance suggests a potential for upside, but investors should remain cautious due to ongoing handset pressure and uncertainty surrounding data center execution.

JW AI conclusions

Short- and medium-term model interpretation

AI context bias	Mixed
AI analysis updated	Sep 3, 2026 2:14 PM EDT

Short-term scenario

Cautious/speculative buy on dips or hold existing; high uncertainty from handset mix, memory supply, and lack of near-term catalysts. Watch volume breakout >172.

Three-month outlook

Modest upside potential toward \$180-200 if Q4 execution holds and auto/AI news (data center inflection, design wins) materializes, aligning with analyst consensus Hold and ~\$193-204 PT. Diversification (auto run-rate targeting \$7B, non-handset growth accelerating to >60% in FY27) is progressing but remains a 2027-2029 story. Significant uncertainty: persistent handset headwinds (Apple attrition, memory inflation, China), data-center revenue still small with execution/competition risks, supply-chain costs, and macro. Volatile; could retest \$150s on any miss. Not high-conviction for large near-term moves. ()

Market sentiment

Mixed-to-cautiously optimistic among traders. Some watching for breakout above \$172 toward \$190s this month, citing AI data-center/CPU (Oryon, HBC memory, Modular/Alphawave), auto, and edge AI optionality as underpriced vs NVDA/AMD. Mentions of accumulation, positive flow, and cheap multiple. Concerns persist on handset secular pressure, Apple, memory costs, and execution timeline (data center still 2027+). Not high-conviction crowd favorite currently. () ()

Supporting evidence

QCOM beat Q3 revenue estimates and raised its FY2029 non-handset target to \$40B. | Technical indicators show a bullish recovery with price above short-term moving averages and RSI in neutral territory. | Traders are watching for a breakout above \$172 towards \$190s, citing AI data center/CPU (Oryon, HBC memory, Modular/Alphawave), auto, and edge AI optionality as underpriced. | Recent wins in AI gaming tech and HUMAIN Snapdragon X2 Elite AI PC suggest progress in key growth areas.

Risk watch

Handset market headwinds from Apple attrition, memory inflation, and China demand remain a concern. | Data center revenue is still small and faces competition risks, with significant growth expected in 2027-2029. | Supply chain costs and macro uncertainty could impact future performance.

Important disclosures

Scope, limitations, risk and permitted interpretation

General market information only

This report is general quantitative research and market commentary. It is not investment, legal, tax or accounting advice; it is not an offer, solicitation, order, recommendation or promise of performance. It does not consider any reader's holdings, objectives, financial circumstances, risk tolerance or suitability.

Model observations - not instructions

JW Rank, strategy fit, model reference, upside scenario and risk reference levels are model observations. They are not entries, price targets, stops, position sizes or instructions to buy, sell, open, close or hold a security or option. A higher score does not imply lower risk or a guaranteed favorable outcome.

Data, AI and model limitations

Prices, volumes, fundamentals, options data, news-derived context and model outputs reflect the timestamps shown and may be delayed, incomplete, revised or inaccurate. AI-generated explanations can omit context or produce errors. Models can fail when volatility, liquidity, correlations or market regimes change.

Performance and scenario limitations

Past, hypothetical, back-tested, simulated and model-derived results are not indicative of future results. Strategy statistics may exclude commissions, fees, taxes, slippage, early assignment, execution constraints and other costs unless expressly stated. Actual outcomes may differ materially.

Options risk

Options are complex and are not suitable for all investors. They may involve total or substantial loss, assignment, early exercise, margin calls, liquidity and spread risk, volatility and Greek exposure, event risk, regime shifts and expiration risk. Multi-leg positions may not execute or close at modeled prices.

Investor responsibility and ODD

Use current market information, assess suitability independently and consult qualified professionals when appropriate. Before trading listed options, read Characteristics and Risks of Standardized Options (ODD) available from the Options Clearing Corporation at theocc.com.
